

Results Block:

Testosterone Dose: Unit will be “mg Pellets”

Last Testosterone Dose: It will show the last testosterone dose from the user **Input**

Notifications Block:

(These will be shown as texts under the results)

Testosterone Dose Calculation:

It will show the last testosterone dose from the user **Input just below the result**

1. Only if **PSA Up-to-Date?** is “No”, then there will be a notification- “**AUA recommends annual PSA test over 55 years of age.**”
2. If **Did patient experience symptom relief since last procedure?** Is “No”, the **New Testosterone Dose** will be **200 mg more** than the **Last Testosterone Dose**.

There will be a notification- “**Dosage is increased one level due to lack of symptom relief.**”

(Eg. If last testosterone dose 2000, new testosterone dose will be 2200. If last is 0, new will be 200 and similar for other values.)

3. If **Did patient experience symptom relief since last procedure?** Is “Yes”, the **New Testosterone Dose** will be **200 mg less** than the **Last Testosterone Dose**.

There will be a notification- “**Dosage is decreased one level due to symptom relief**”

(Eg. If last testosterone dose 2000, new testosterone dose will be 1800. If last is 0, new will be 0 and similar for other values. New Testosterone Dose can not be a negative value)

4. If **Did patient experience symptom relief since last procedure?** Is “Yes”, **and at the same time users mark any of the following checkboxes** the **New Testosterone Dose** will be **equal to** the **Last Testosterone Dose**.

Sleep Issues☐**Night Sweats**☐**Moodiness**☐**Low Libido**☐**Brain Fog**☐**Joint Pain**☐**Depression/Anxiety**☐**Fatigue**☐

Design Change

Please make some CSS changes to make the above checkboxes more compact. Maybe 3 checkboxes per row so that it takes up less space.

Thank you.
